DRAFT

White House Central File  
Subject Files  
TR - Trips

ROUGH DRAFT summary narrative

Subject file category TR contains material pertaining to trips planned or made by the President, both within the United States and abroad. Included are invitations, schedule and event proposals, itineraries, logistical and transportation arrangements, post-trip thank you letters, and correspondence reflecting public reaction to trips made.

While most White House Central File subject categories reflect functional, administrative, or topic groupings, the numbering system for TR was case-file oriented. Each trip was assigned a separate case number, with the exception of some campaign trips. While the category includes trips taken from 1969 through 1974, the case file numbers do not run consecutively throughout the period. The White House Central Files unit separated the case files into two series by imposing a file break after 1969-70. This resulted in double use of some of the numbers, with the first series numbered consecutively from 1969 through 1970, and the second series re-starting consecutive numbering anew for 1971 through 1974. Thus while the TR file generally runs chronologically, it is necessary to remember that there are two separate numbering schemes, with the break occurring at the end of 1970.
